Word Explanation

CE: Casual Engine

Microsoft .NET Framework: It is the platform for new kind of software to run on. It is the heart of Windows operating system.

Parameter

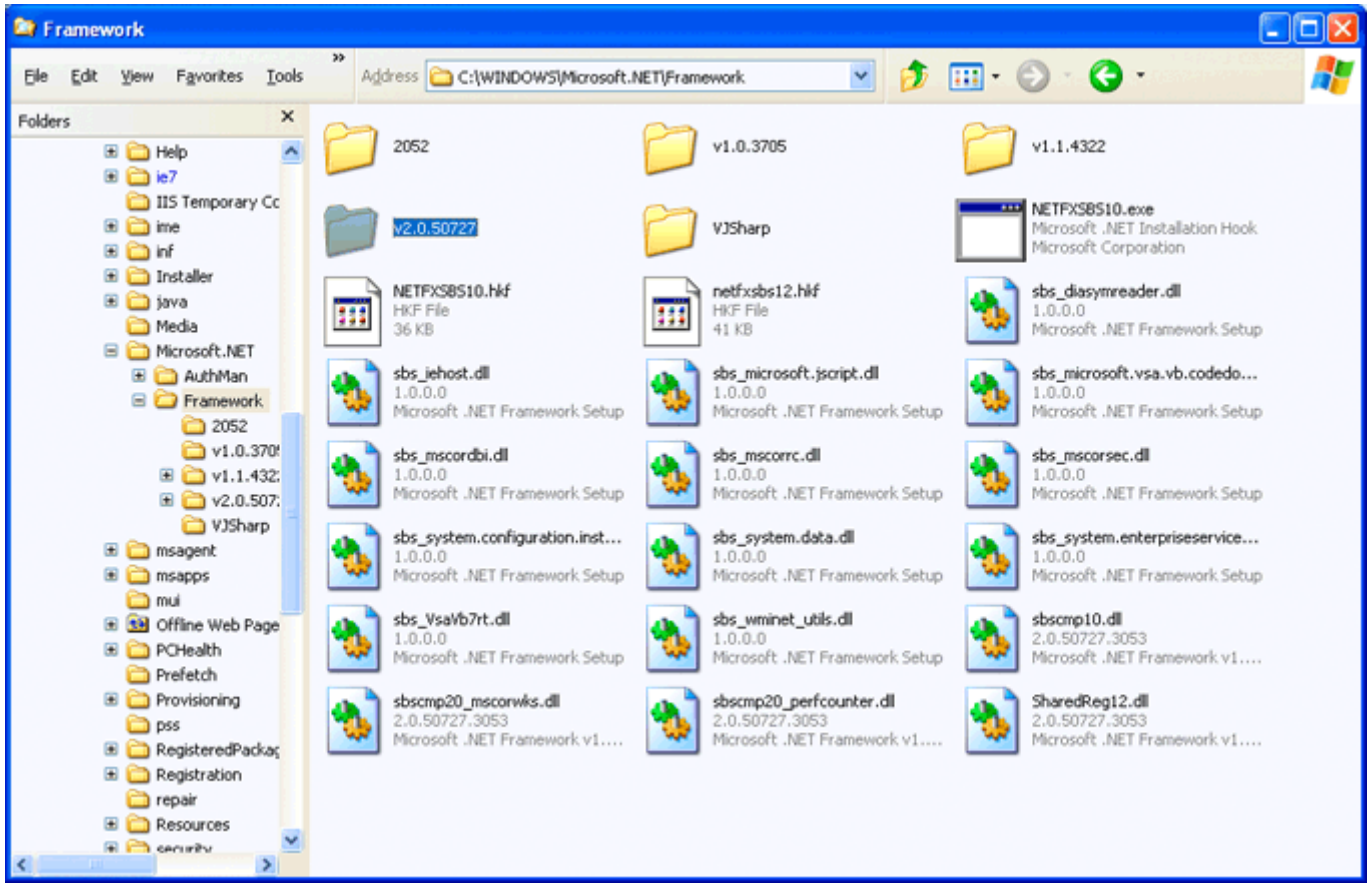
Fee: 0.00 US dollar. This software is totally free for enterprises and individuals. Besides, it is free for governments, charities, hospitals, universities and other organizations. Vitally, you can directly copy and include it in your commercial products and services for free. You just need to provide a link to this Website. The URL is:
http://www.casualengine.com/

Version: 1.0
Operating System: It does not support Linux. It supports:
Windows 7/Vista/XP/2000/98. Vitally, it supports Windows Server 2008/2003/2000 and their R2 editions.

CPU: 400MHz. You can definitely run this software if your computer can start.
RAM: 12MB.
Hard Disk: 28KB. You do not have to worry about the hard disk at all.

Installation

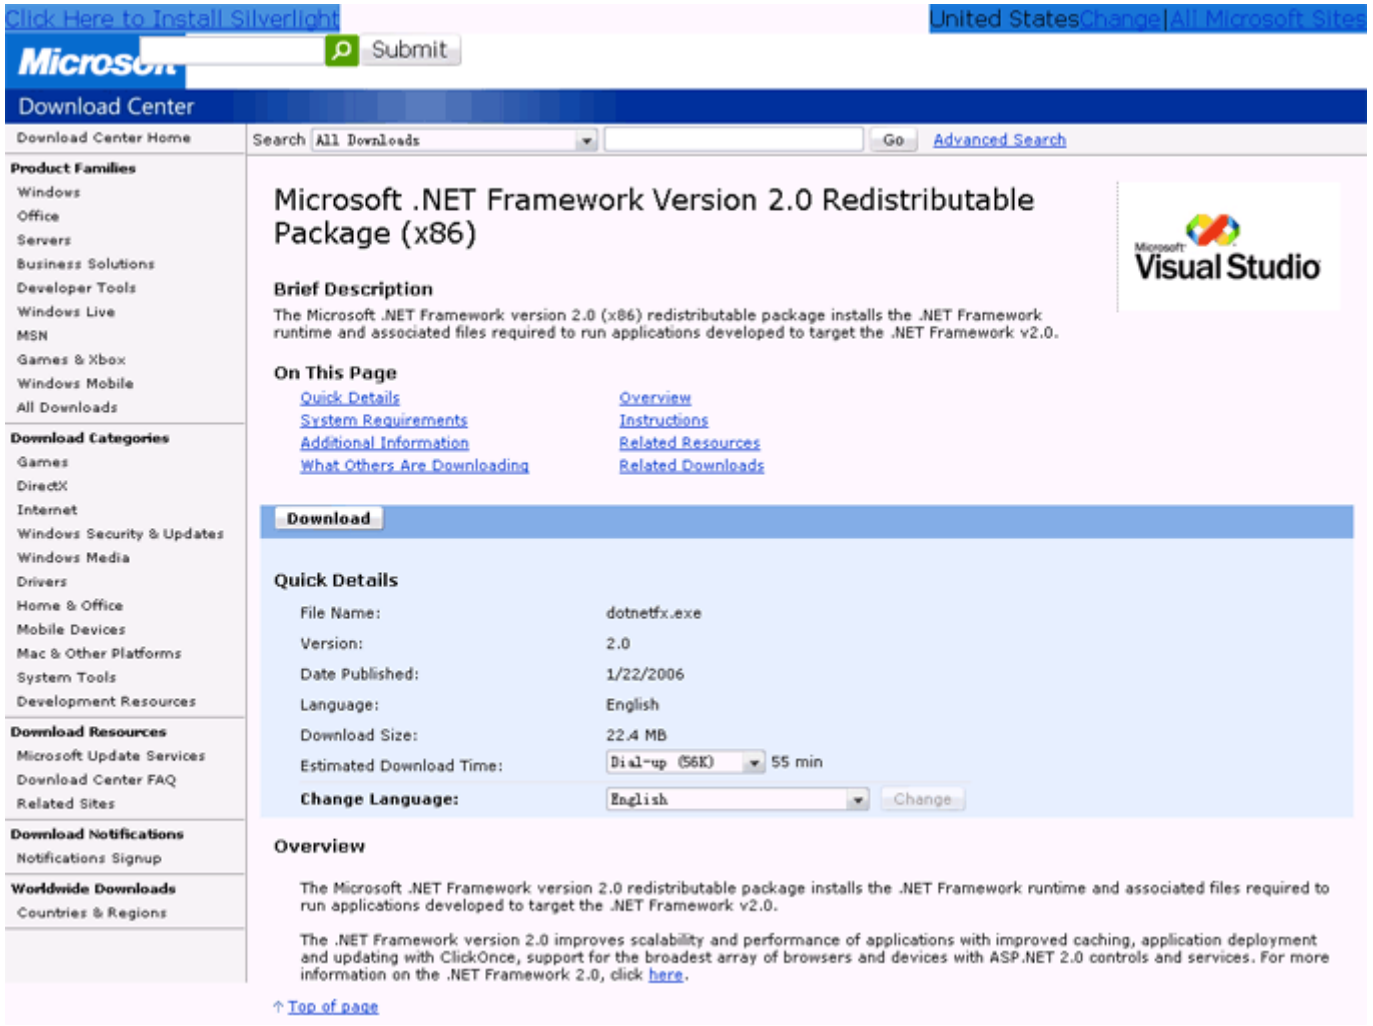
Notice that this software requires *Microsoft .NET Framework* 2.0 and SP2. You have to install them first.



To see whether your computer has already installed this platform. You can check your computer.

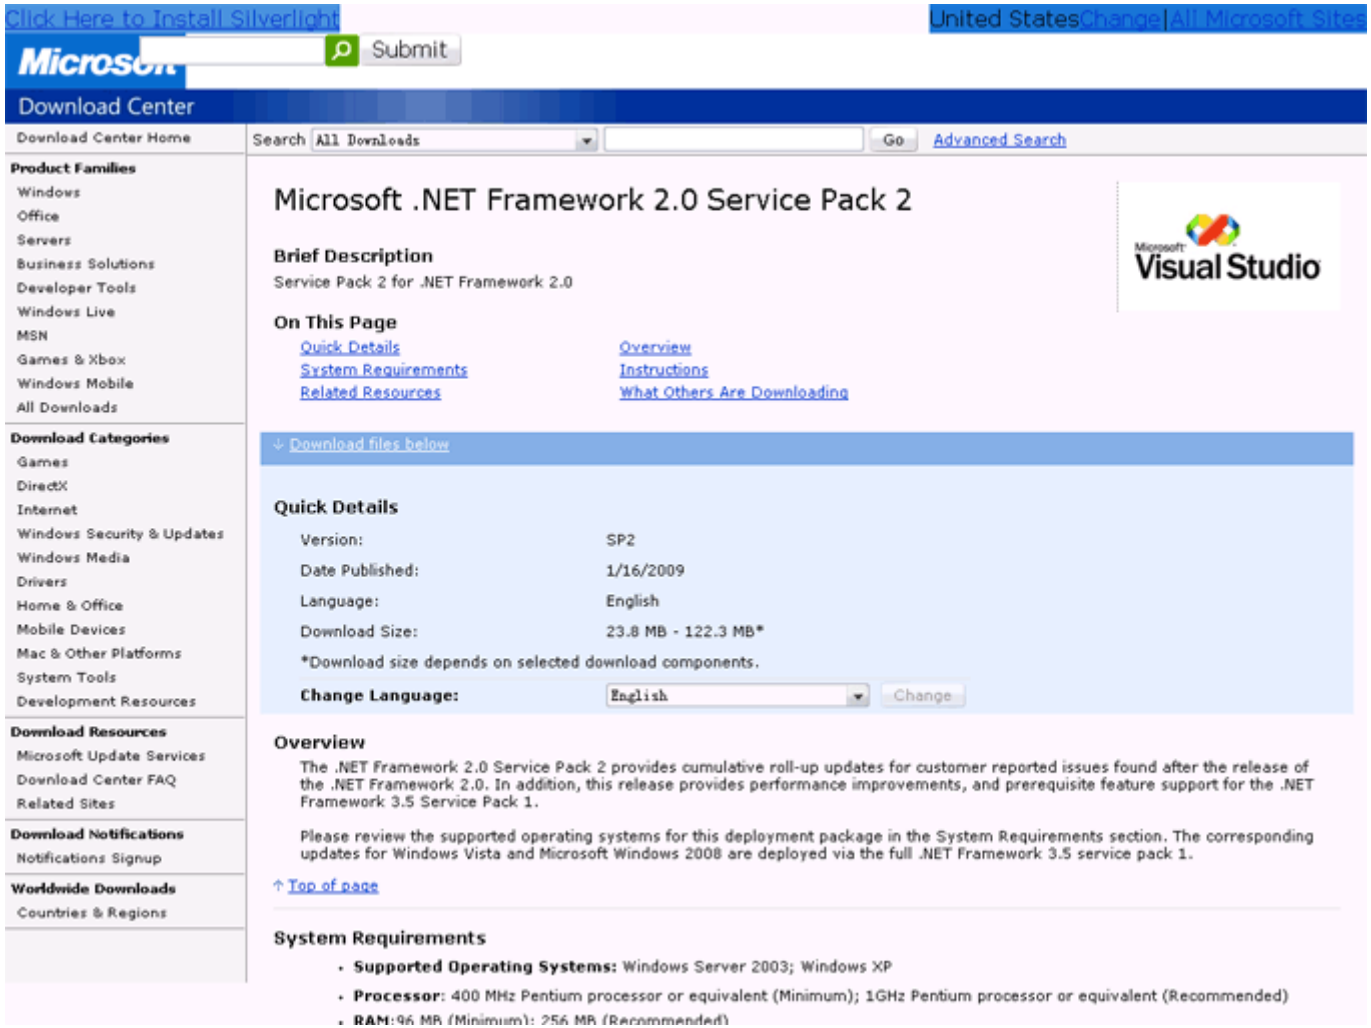
C:\WINDOWS\Microsoft.NET\Framework

You can see the folder: **v2.0.50727**. If you cannot find it, you have to go to Microsoft Download Center to download and install them.



Please download *Microsoft .NET Framework Version 2.0 Redistributable Package.* This image shows its 32 bit edition. You should download its 64 bit edition if your computer is 64 bit. This is the platform for new kind of software to run on. The URL is:

http://www.microsoft.com/downloads/details.aspx?FamilyID=0856eacb-4362-4b0d-8edd-aab15c5e04f5&DisplayLang=en



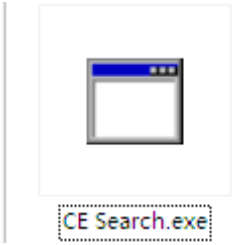
Then, you have to download its SP2: *Microsoft .NET Framework 2.0 Service Pack 2*. The URL is: **http://www.microsoft.com/downloads/details.aspx?FamilyID=5b2c0358-915b-4eb5-9b1d-10e506da9d0f&DisplayLang=en**

Tip: *Microsoft .NET Framework* 2.0 and SP2 are extremely important for new kind of software. CE strongly recommends you to save them in your flash drive and portable hard disk. You do not have to

access the Internet and download them repeatedly, if you use other computers. Many computers have not yet installed them by default.

After installation of the *Microsoft .NET Framework* 2.0 SP2 platform, you can unpack the .zip file and open the folder. It has two editions: *USB* and *Installation*.

The USB edition does not require installation at all. You can simply click **CE Search.exe** to run this software. It does not write data into Windows Registry or hard disk at all. It just runs on the memory temporarily. Besides, after closing the software, it will be totally removed from your computer.



It supports 32 and 64 bit systems at the same time.

It does not contain icons. Therefore, it uses the default icon of *Windows* operating system. Indeed, it looks ugly. You should complain about Microsoft Corporation. Note that it is not virus. You should not mistake it later. You should save it in your flash drive or portable hard disk.

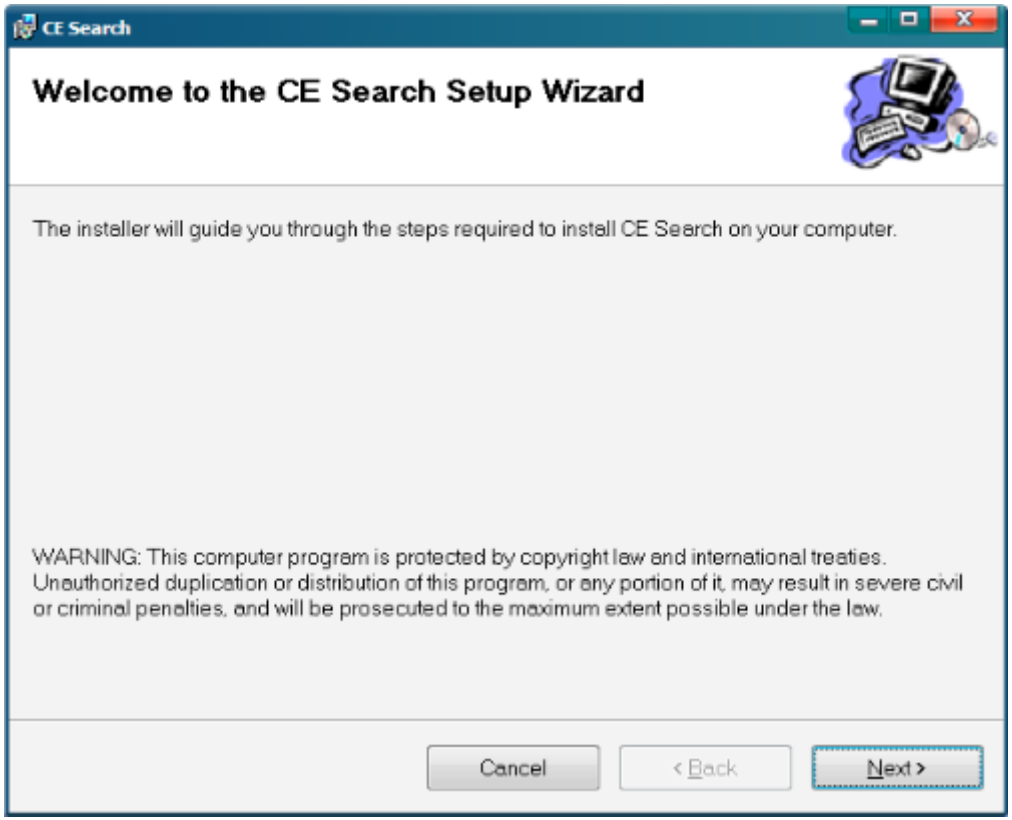
The USB edition is quite useful if you use other people's computers. It is impolite to install software

in computers of your friends. Similarly, you may not be allowed to install any software in office or other public computers, because these computers have been locked. You can still use this software if you use the USB edition. Definitely, to use this software, you have to persuade the owners to install the *Microsoft .NET Framework* 2.0 SP2 platform first.

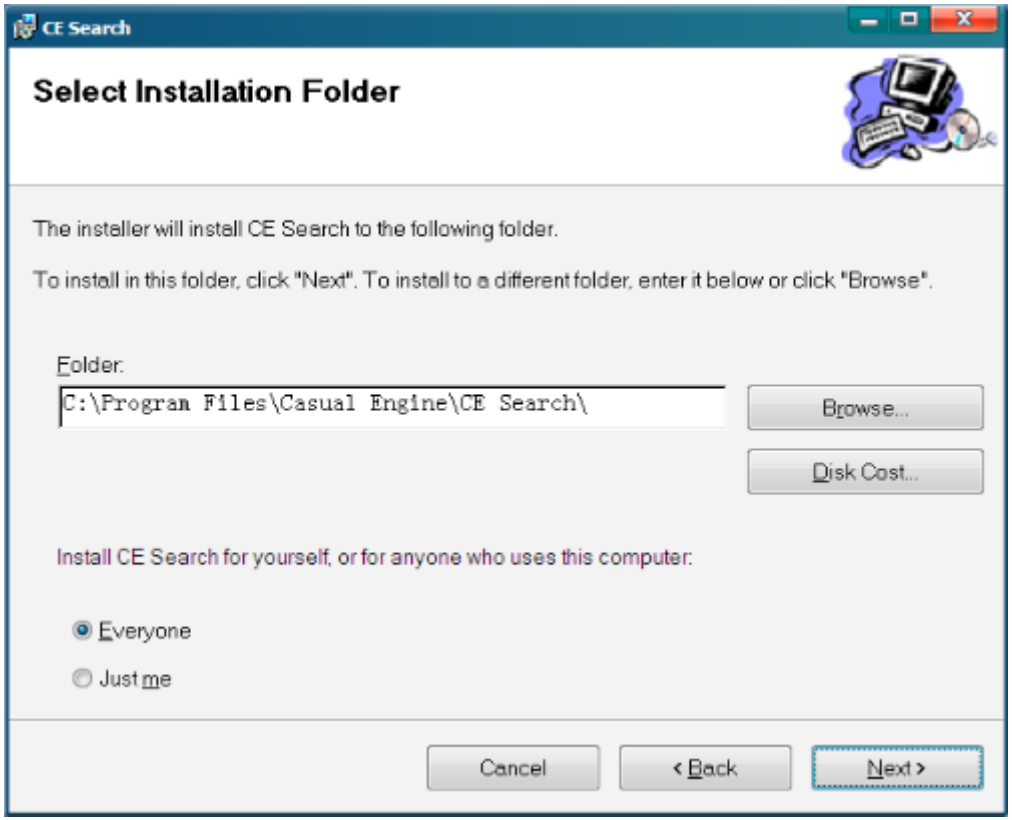
Definitely, you can install the software directly, if you are using your own computer.

Then, you have to choose the system first. x86 means 32 bit while x64 means 64 bit.

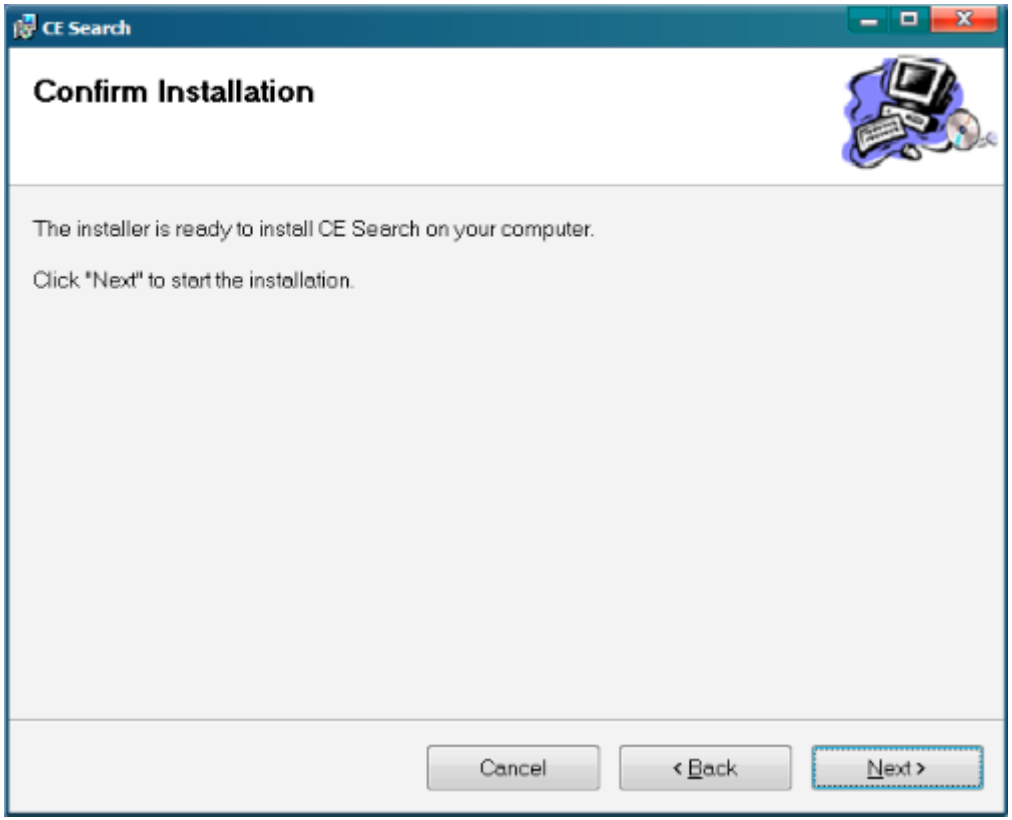
For example, you can click **Setup86.msi** to install it if your computer is 32 bit.



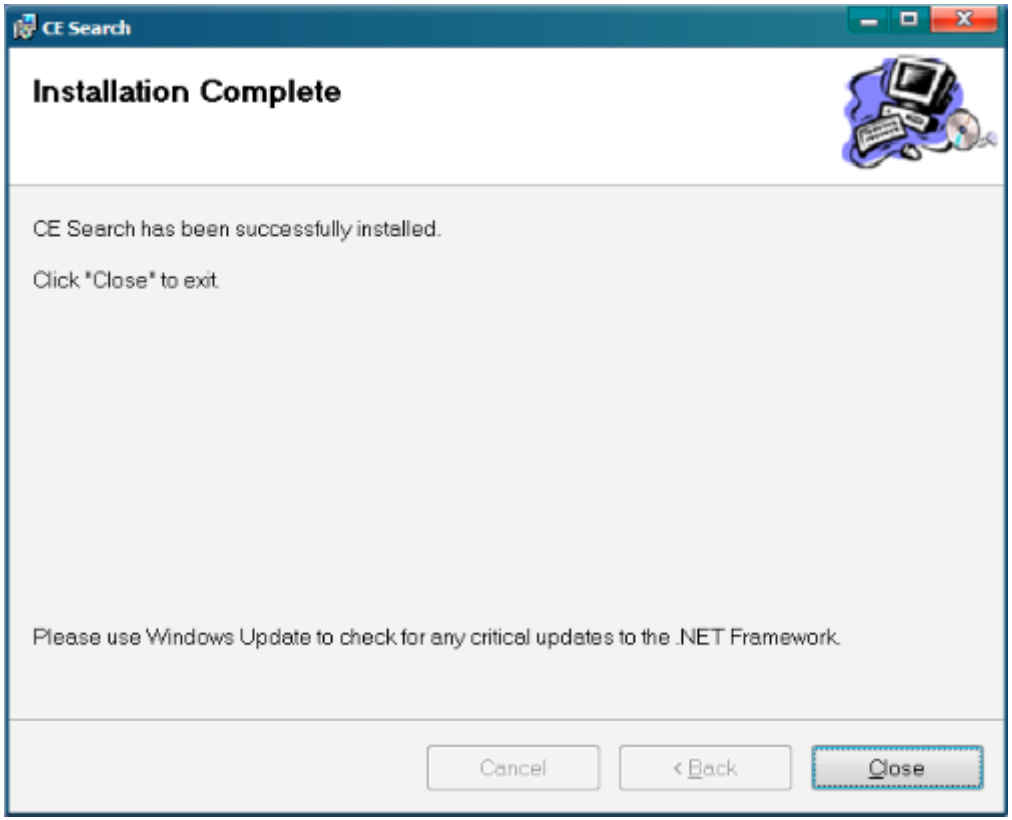
This is the wizard of installation. Click “Next” button.



Usually, you do not have to change the folder. Besides, everyone can use it by default. Click “Next” button again.

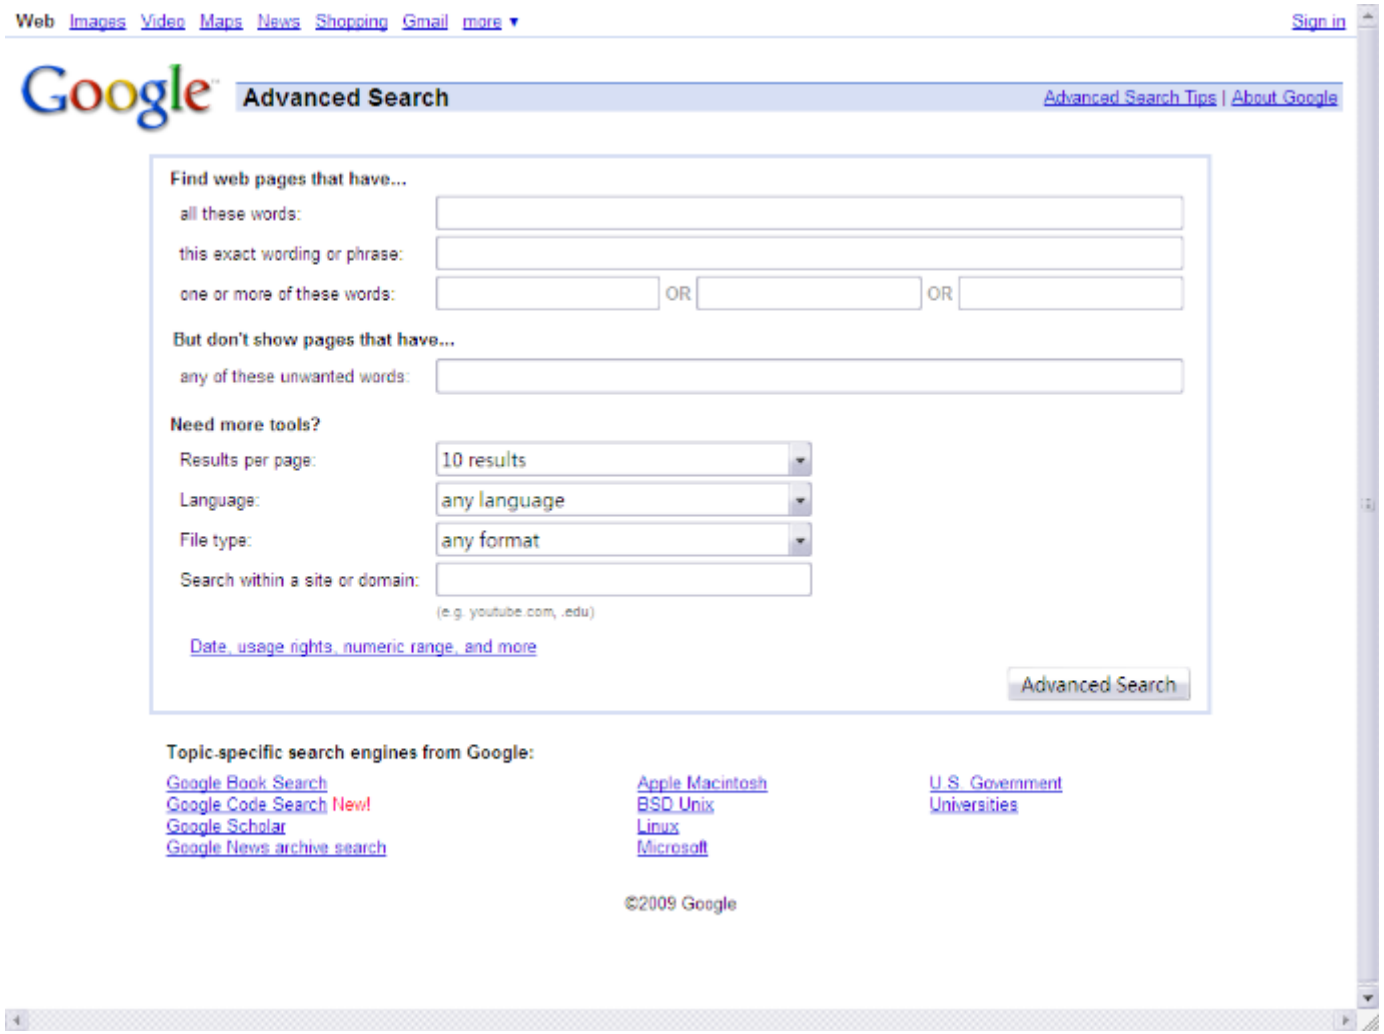


Finally, you can click “Next” button to start installation.



After installation, you can close this wizard. It has been installed in your computer successfully. You can start the software on [Start] menu.

Preface



Search engines provide advanced search for Internet users. However, they do not really want uses to use it. You will not click the advertisements of the sponsors of the search engines, if you can find your

things accurately.

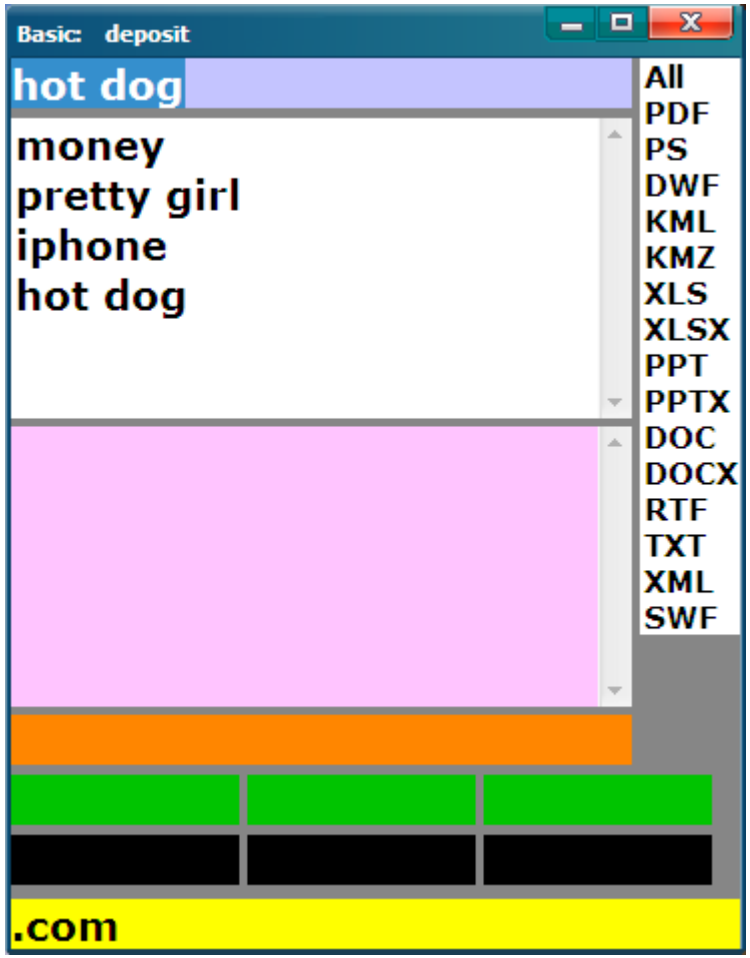
Therefore, search engines try their best to prevent you using the advanced search. It is quite inconvenience to use the advanced search pages.

For example, you can enter the keywords in the advanced search page of *Google*. Then, you will click "Advanced Search" button. However, the search result is not opened in a new window. Instead, it directly shows the search results in the same window. It means that you can hardly change the keywords, and continue to use the advanced search. Vitally, all the keywords have been removed, even you click the "Backward" button of your browser to go back to this Web page.

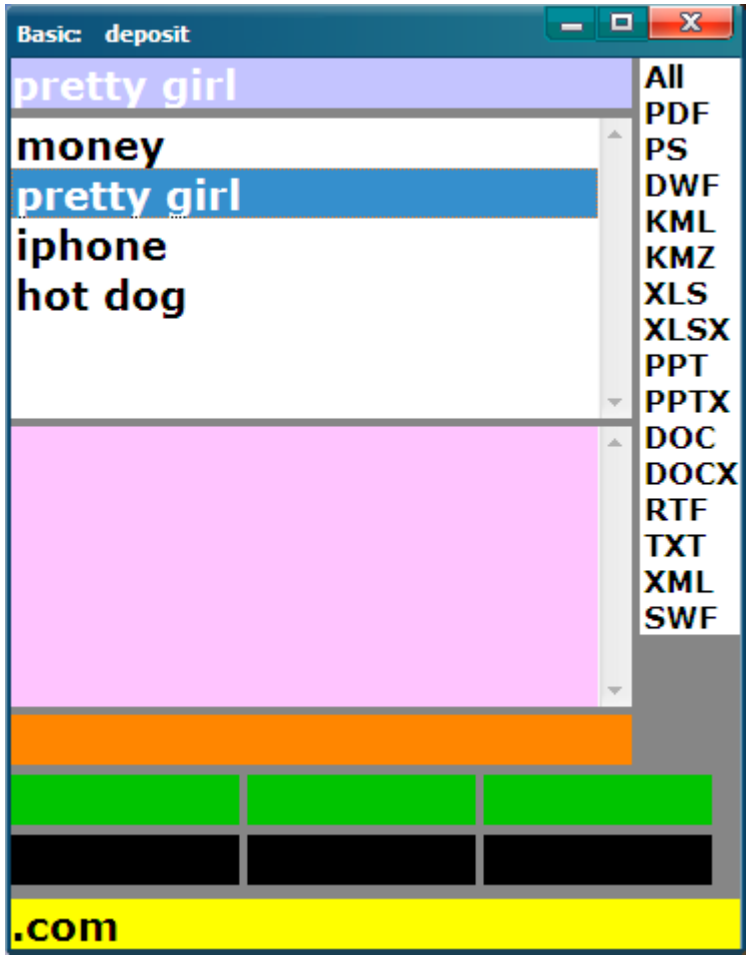
This is the evil of search engines.

Therefore, CE Search™ comes to help you search things with accuracy. It remains all the keywords in your computer, which you may use repeatedly. Vitally, you can use the advanced search with efficacy and ease.

Basic Search

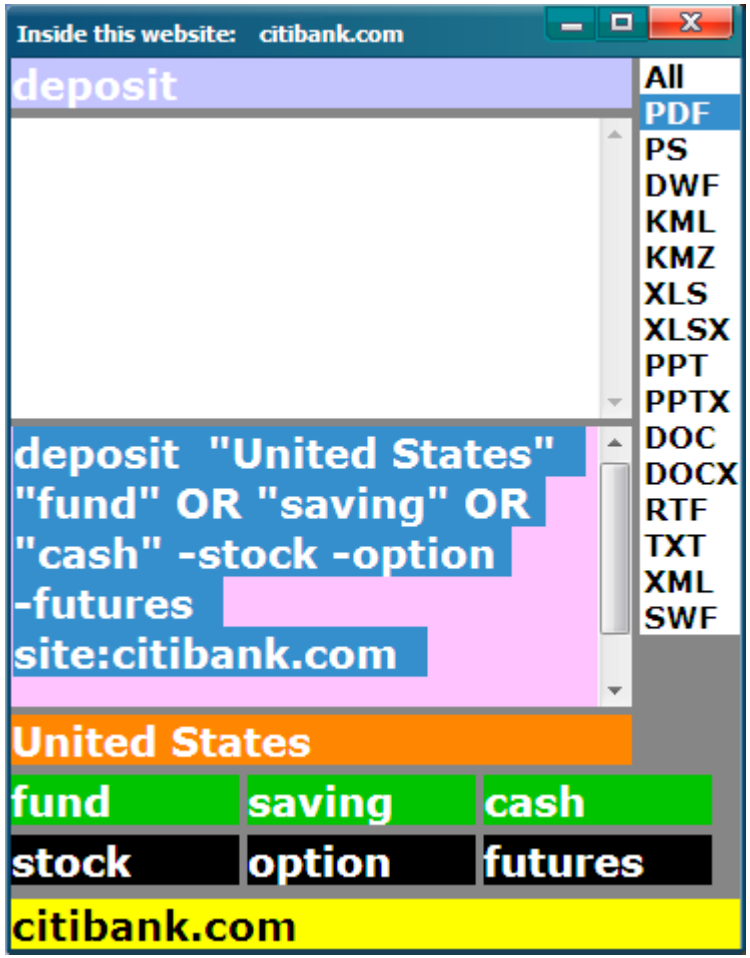


You can enter a keyword in the top basic search box, and then press **<Enter>** key. It will stores all of your keywords in the white list box below.



To use a previous keyword, you just need to double-click the keyword in the white list box. The keyword will be shown in the basic search box again. Then, you can copy and paste it to the search box of search engines. To delete the specified keyword in the list box, you can simply press **<Del>** key.

Advanced Search



You can use the advanced search directly.

For example, you want to know whether Citibank will bankrupt. You want to see its **deposit** and want to know how much money is left inside. It means that you just want to see its **fund** **saving** or

cash in **United States**, not its **stock**, **option**, **futures**, or other unwanted data. Besides, to avoid useless editorials, news or rumors from media or other Websites. you just want to get the **PDF** files from its official Website of **citibank.com**.

Press **<Ctrl+F>** key or double-click the gray area to create the final keywords. Besides, they are selected all. You can copy them directly by pressing **<Ctrl+C>** key. The final result will be shown in the middle pink box. You can edit it directly if necessary.

The text boxes are:

Phrase: It tells search engines that it is a phrase or name, and has to search it exactly. It is quite suitable for personal name, company name, city, province, country, terminology, zip code, and telephone. (**“”**)

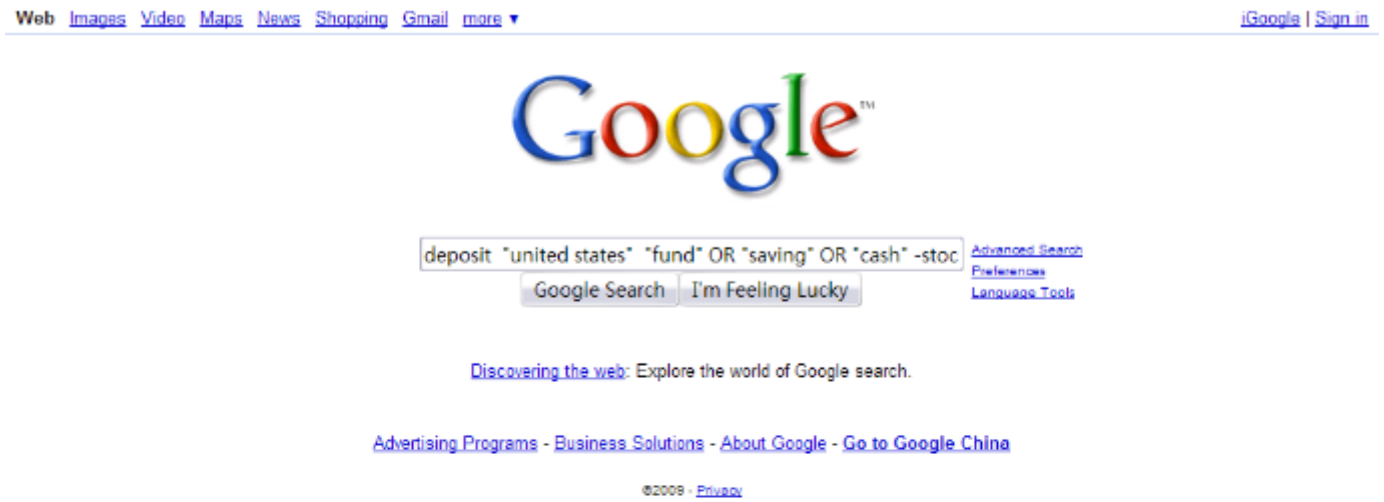
OR: It is quite suitable for synonyms. Many keywords have similar meanings. Alternatively, you want to find many relevant and similar things. Then, you can search them at the same time, so that you cannot lost any contents. Notice that it supports phrases by default. (**OR**)

NOT: You do need any unwanted things, which search engines may mistake. For example, you want to find data about natural virus, not computer virus. Then, you can use it to remove the data or Web pages about computer virus. Notice that it does not support phrase at all. (**-**)

Website: You want to search the data or Web pages inside the specified or official Websites, not from other Websites. It is quite useful. Notice that many Websites have sub-domains. As a result, search engines recommend you to use incomplete domain names. For example, you should use *citibank.com* instead of *www.citibank.com*. (**site:**)

File type: You want to find some files, not Web pages. In this case, you can choose the file type

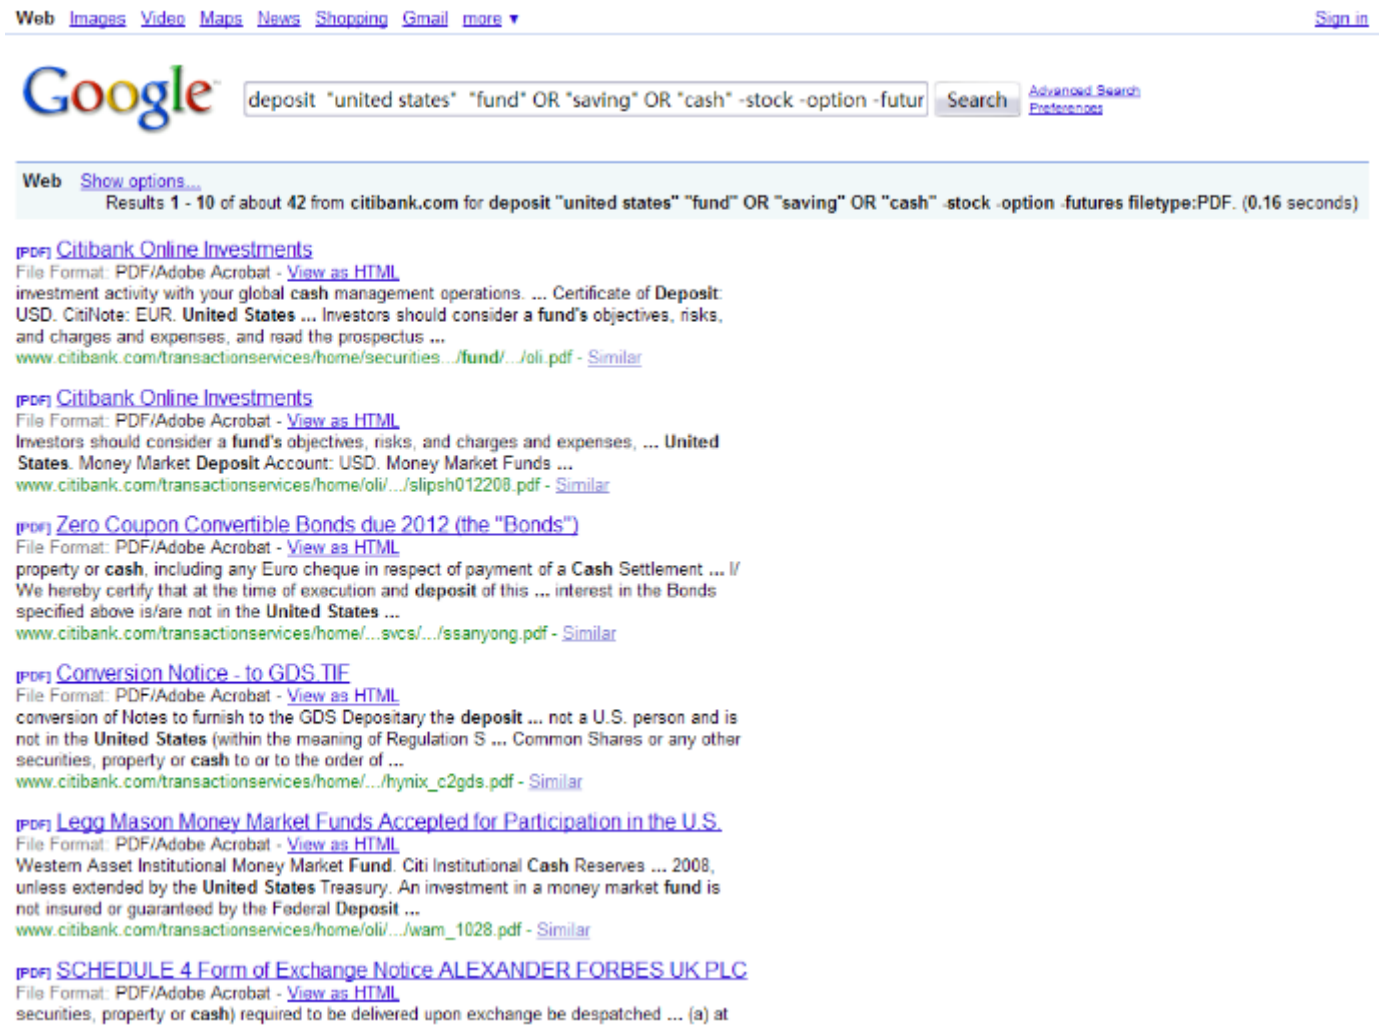
directly. Note that *Bing* does not support many file types. *Yahoo!* does not use this grammar at all. You can type your file type directly, if CE Search™ does not list them inside. (**filetype:**)



Finally, you can paste the keyword in the homepage of search engine.

The final keywords will be:

deposit "United States" "fund" OR "saving" OR "cash" -stock -option -futures site:citibank.com filetype:PDF

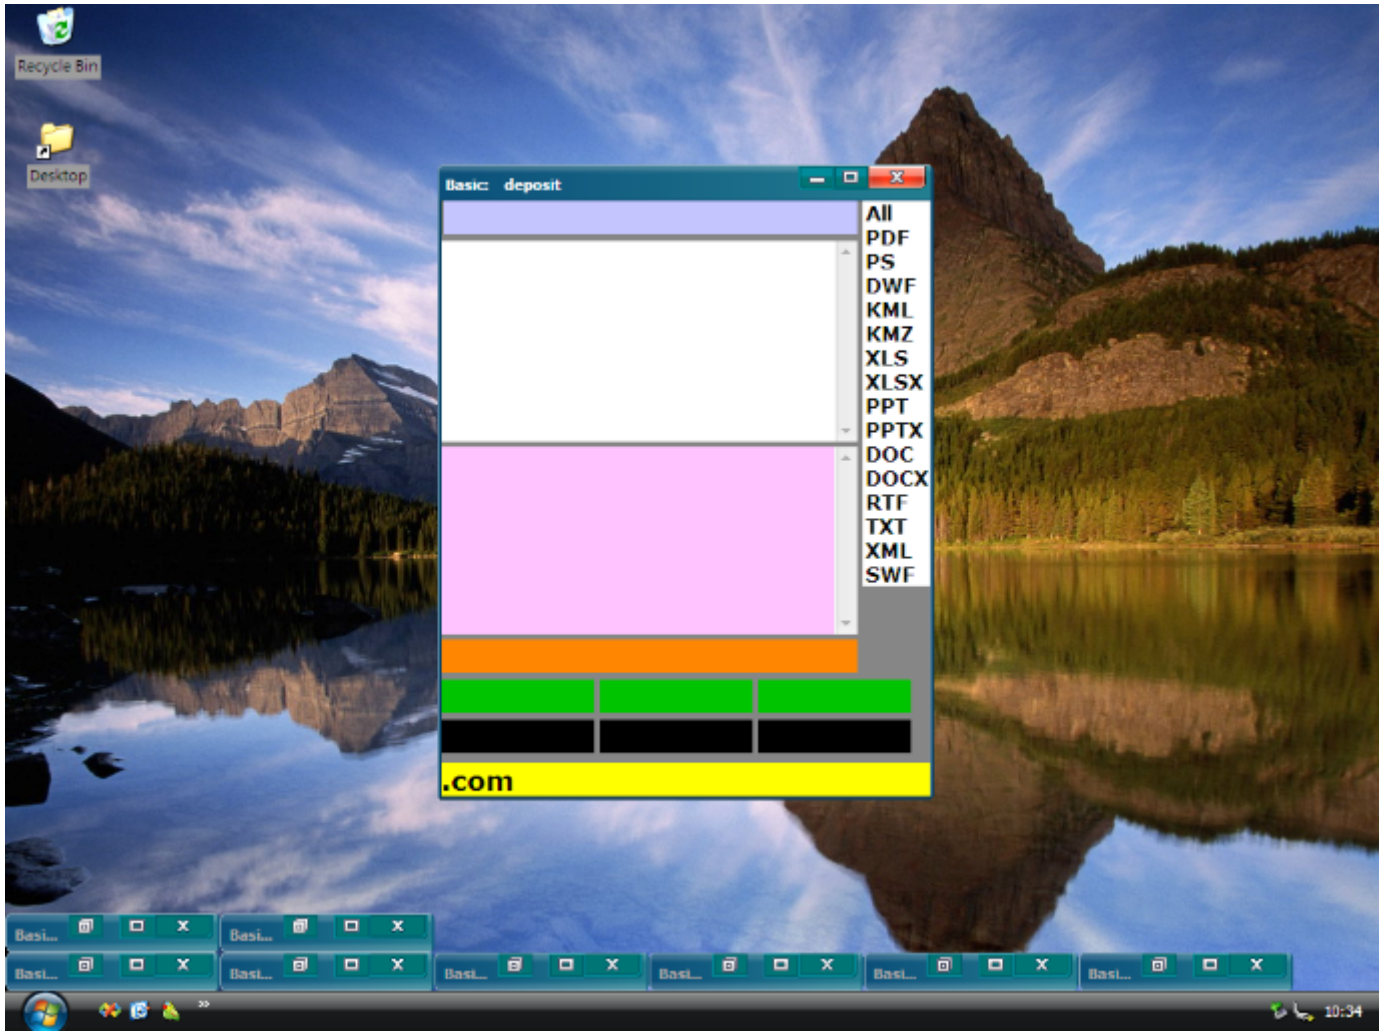


The search result will look like this image.

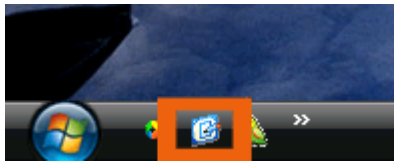
Unlike the Web page of search engines, you can edit the keywords freely and continue to use advanced search, because all the keywords are stored in your computer.

Invisible Mode

Sometimes, you need to leave your computer for a while. You may have to get reports, drink coffee, or go to toilet temporally. Definitely, you do not want others to see your contents, because they may be sensitive.

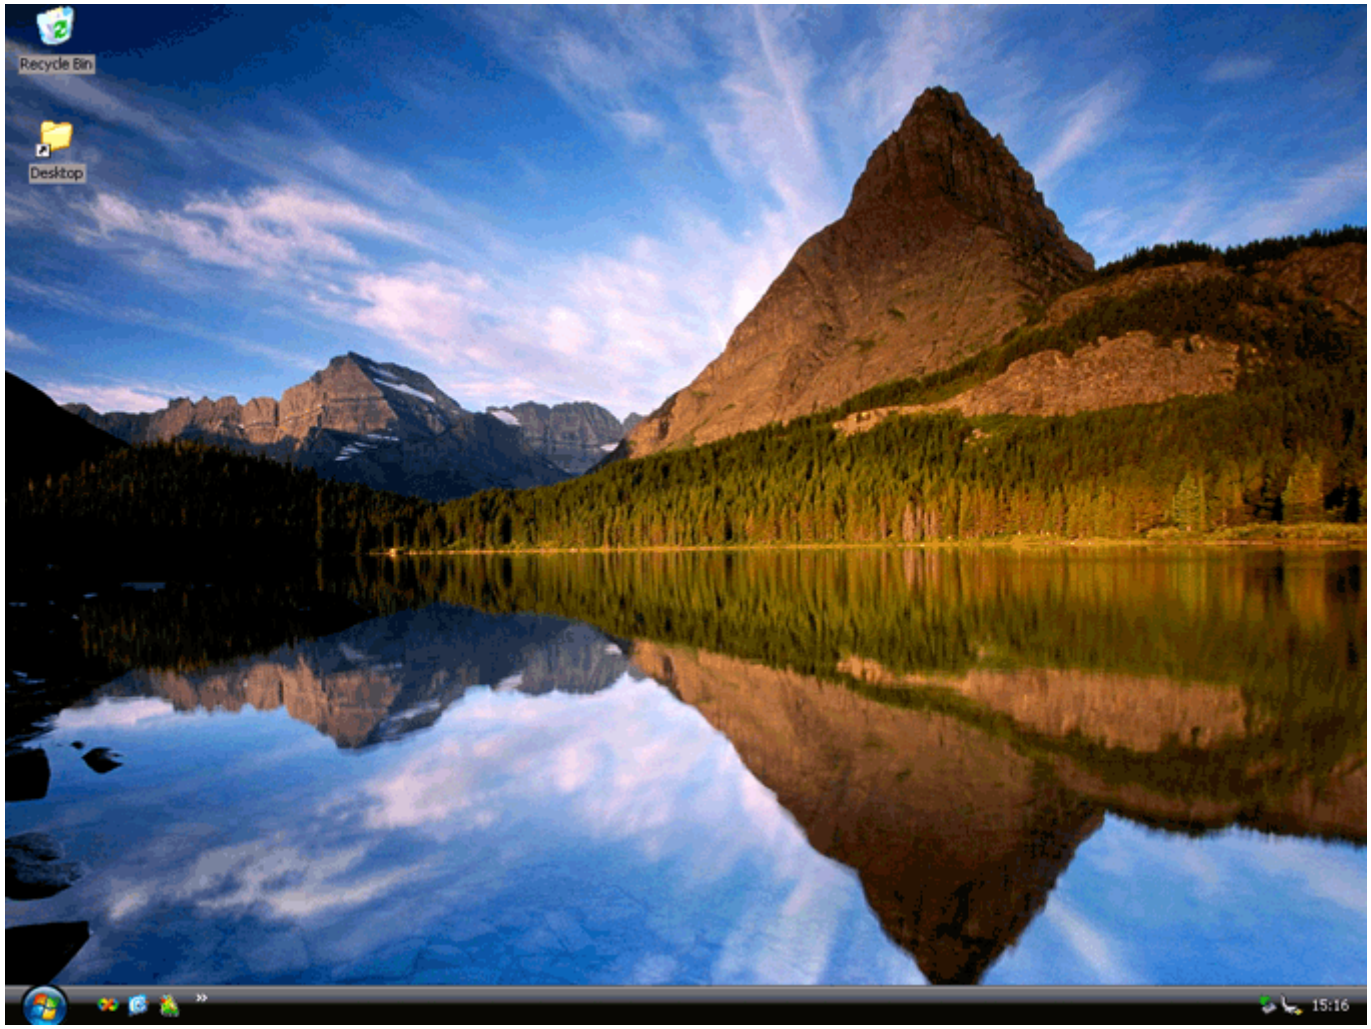


In this case, you do not have to save the contents and exit the program, and then restart the program and continue to edit the contents. Through the invisible mode, you can hide all the windows behind the desktop.

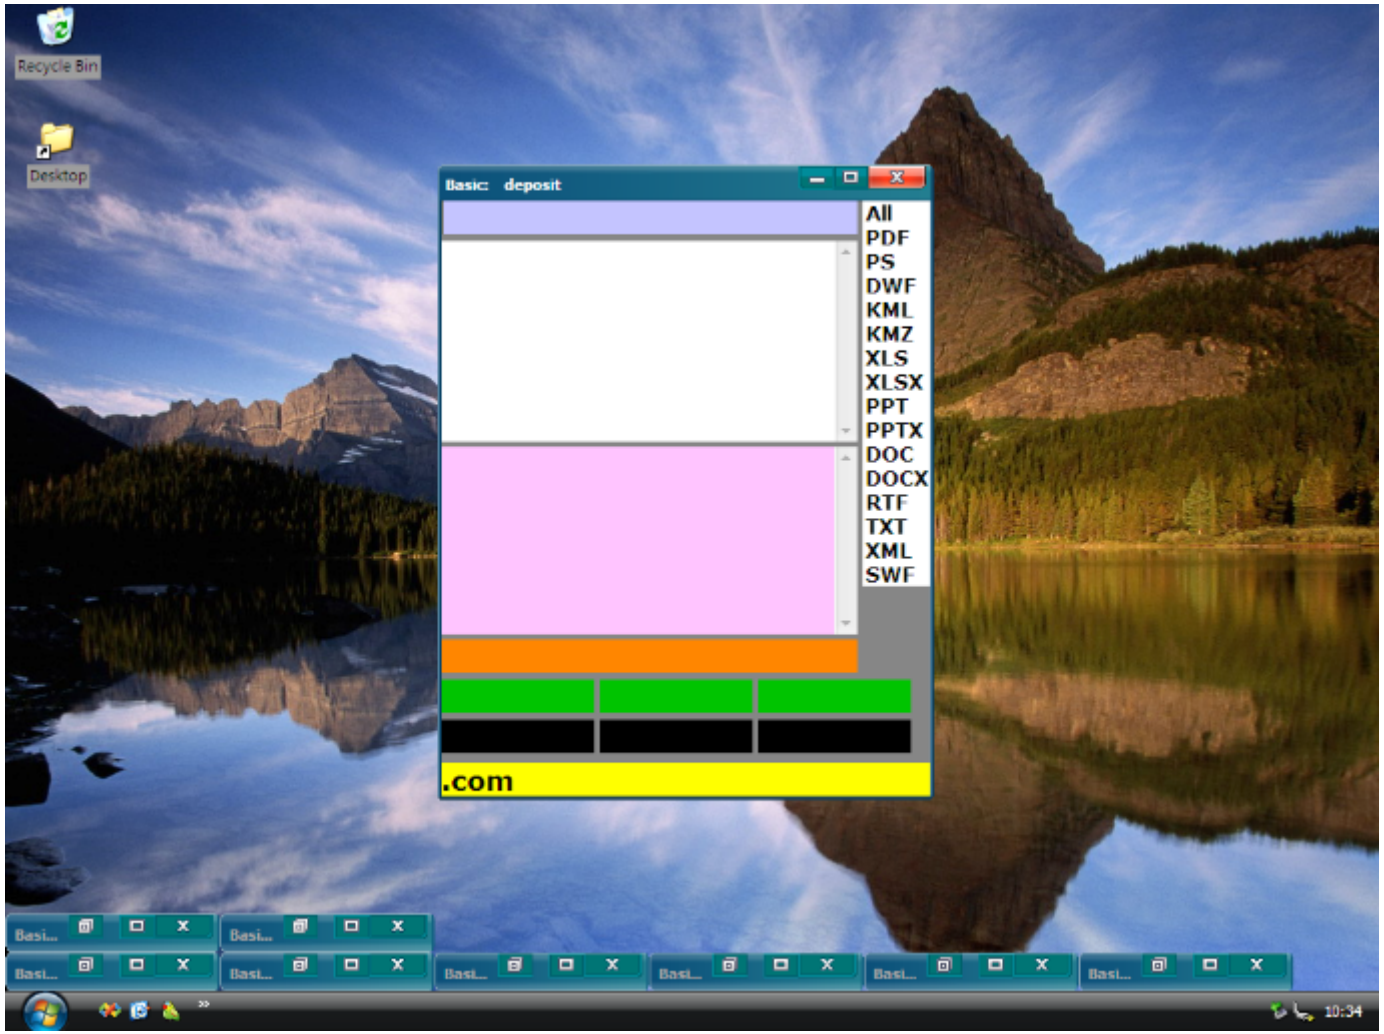


You can simply click the “Desktop” icon on taskbar. Alternatively, you can press **<Win+D>** key.

Tip: **<Win>** is the key, which has the logo of Microsoft.



All the windows will disappear immediately, without leaving any vestige. It is the magic of this software. You do not have to worry about the contents after the disappearance. The contents will remain inside the windows.



After clicking the “Desktop” icon or press **<Win+D>** key again, you can see all the windows for the second time.

Shortcut Key

You can press shortcut keys on your keyboard. Combination keys mean that you keep pressing the first key and then press the second key. For example. **<Ctrl+A>**: Keep pressing **<Ctrl>** key and then press **<A>** key.

<Tab>: move the cursor.
<Ctrl+F>: Show the result of advanced search.
<Del>: Delete the keyword in the list box of basic search.

<Ctrl+M>: Minimize the window.

<Ctrl+T>: Show *www..com* or *www..net*
<Ctrl+E>: Show *www..org* or *www..gov*
<Ctrl+W>: Show *.com* or *.net*
<Ctrl+T>: Show *www.*

<Alt+~>: Search inside *Wikipedia.*
<Alt+1>: Search inside *Microsoft.*
<Alt+2>: Search inside *Microsoft Download Center.*

<Alt+3>: Search inside *Microsoft Technet.*

<Alt+4>: Search inside *Microsoft Support.*

<Alt+5>: Search inside *MSDN.*

<Alt+6>: Search inside *Red Hat.*

<Alt+7>: Search inside *Red Hat Enterprise.*

<Alt+8>: Search inside *Red Hat Linux.*

<Alt+9>: Search inside *Red Hat FAQ.*

Tip: When the cursor is inside a list box, you can press the first letter of the value to select the value efficiently. For example, you can press **<P>** key to select "PDF" in the file type list box. If you press **<P>** key again, it will select "PS". Again, if you press **<T>** key, it will select "TXT". You can also use this skill to select your previous keywords of basic search.

Security

CE Search™ is secure software:

It does not contain any virus, spyware, adware or advertisement. It is clean and pure software.

It does not contain any ActiveX, BHO, toolbar, or other plug-in.

It does not change the homepage or adds contents inside your browser.

It does not use third-party components. All the functions come from original codes.

It is totally offline. Anyway, it will not access the Internet for registration, verification, update, upgrade, error report or other purposes.

It does not save your keywords to the hard disk.

It does not run automatically after you start the computer.

It locks itself when running. Virus or hackers cannot use it to attack the computer.

You can install the software (Installation Edition). Definitely, it has to write basic data in the Windows Registry and hard disk. However, the data will be totally removed from Registry and hard disk after uninstallation.

Quality

CE Search™ is high quality software:

It does not have any bug, error or loophole. From programming to testing, it has strict quality control.

It uses C# 2.0 as the programming language to guarantee the security of memory when the software is running. It will never cause *Memory Leak*.

It works stably. It runs without collapse.

It works on the background, and does not influence Web pages and other programs at all.

Its interface has been designed carefully. The operating system cannot be hurt even users operate this editor mistakenly and blindly.

It requires a little resources of CPU and memory.

FAQ

Q: Can I use different groups of keywords?

A: Yes. CE Search™ supports multiple windows. You can use several keys in one windows and then use other keywords in another window. As a result, you can use different groups of keywords, and search different things at the same time.

Q: Does CE Search™ support all the search engines?

A: No. The grammar of CE Search™ is totally based on *Google. Google* supports it well. *Bing* does not supports some file types. *Yahoo!* does not support many grammars. Other local or small search engines may not support these grammars entirely.

Q: Do the results of advanced search accurate enough?

A: No. they can never be 100% accurate, because search engines are just machines. CE Search™ just creates the correct keywords and grammars of advanced search of search engines. The advanced search just finds specified and similar contents more accurately, and tries to remove useless and irrelevant contents. Still, the results come from machines, and you cannot find the things you want.

Q: Does CE Search™ save the keywords of advanced search?

A: No. CE Search™ can only stores the keywords of basic search. You can press **<Enter>** key to do

this. However, it does not store the keywords of advanced search. You have to open other windows on [Start] menu to store the keywords of advanced search.

Q: Can I edit the result of advanced search?

A: Yes. You can edit the result of advanced search directly. For example, CE Search™ only supports one phrase and three “OR” keywords. You can edit the content in the pink text box by hand, if you need more phrases or keywords.

Terms of Use

CE Search™ END-USER LICENSE AGREEMENT
By using this software, you are agreeing to the terms of this license.

This End-User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) and the mentioned author (Casual Engine) of this Software for the software product identified above, which includes computer software and may include associated media, printed materials, and "online" or electronic documentation ("SOFTWARE PRODUCT"). By installing, copying, or otherwise using the SOFTWARE PRODUCT, you agree to be bounded by the terms of this EULA. If you do not agree to the terms of this EULA, do not install or use the SOFTWARE PRODUCT.

All versions of the SOFTWARE PRODUCT are protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The sole property belongs to Casual Engine. The SOFTWARE PRODUCT may not be sold in any manner not described herein without the prior written consent of Casual Engine.

1. GRANT OF LICENSE.
This EULA grants you the following rights:

License to.
The SOFTWARE PRODUCT license to enterprises and individuals for commercial and non-commercial purposes in business, commercial and non-commercial environment.

Installation and Use.
You may install and use an unlimited number of copies of the SOFTWARE PRODUCT.

Reproduction and Distribution.
You may reproduce and distribute an unlimited number of copies of the SOFTWARE PRODUCT;

provided that each copy shall be a true and complete copy, including all copyright and trademark notices, and shall be accompanied by a copy of this EULA. Copies of the SOFTWARE PRODUCT may be distributed as a standalone product or included with your own product as long as The SOFTWARE PRODUCT is not sold or included in a product or package that intends to receive benefits through the inclusion of the SOFTWARE PRODUCT. The SOFTWARE PRODUCT may be included in any free or profit packages, services or products.

2. DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS.

Reverse Engineering, Decompilation, Disassembly and Modification.

You may not reverse engineer, decompile, or disassemble the SOFTWARE PRODUCT and change (add, delete or modify) the resources of the compiled assembly, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation.

Separation of Components.

The SOFTWARE PRODUCT is licensed as a single and complete product. Its component parts may not be separated for use on more than one computer.

Software Transfer.

You may permanently transfer all of your rights under this EULA, provided the recipient agrees to the terms of this EULA.

Termination.

Without prejudice to any other rights, the Author of this Software may terminate this EULA if you fail to comply with the terms and conditions of this EULA. In such event, you must destroy all copies of the SOFTWARE PRODUCT and all of its component parts.

3. COPYRIGHT.

All title and copyrights in and to the SOFTWARE PRODUCT(including but not limited to any images, photographs, animations, video, audio, music, text, and "applets" incorporated into the SOFTWARE PRODUCT), the accompanying printed materials, and any copies of the SOFTWARE PRODUCT are owned by the Author of this Software.

4. LIMITED WARRANTY.

NO WARRANTIES.

The Author of this Software expressly disclaims any warranty for the SOFTWARE PRODUCT. The SOFTWARE PRODUCT and any related documentation is provided "as is" without warranty of any kind, either express or implied, including, without limitation, the implied warranties or merchantability, fitness for a particular purpose, or non-infringement. The entire risk arising out of use or performance of the SOFTWARE PRODUCT remains with you.

NO LIABILITY FOR DAMAGES.

In no event shall the author of this Software be liable for any special, consequential, incidental or indirect damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use this product, even if the Author of this Software is aware of the possibility of such damages and known defects.

5. REGISTRATION

No registration of this FILE is required. It may be used free of charge without donation.

Epilogue

Nowadays, search engines are more and more terrible. You can hardly find the things you want through the basic search of search engines. In order to pretend containing many newest contents, search engines get a lot of Web pages from media and junk Websites. Search engines become the collectors of junk news.

Mostly, these Web pages are invaluable, because most enterprises and individuals do not need the junk and repeated news or stupid editorial articles of editors or journalists. You can hardly find the valuable data or Web pages. However, search engines are quite happy to do this, because you can only click the advertisements of sponsors, if you cannot find the things in natural results.

It means that you have to use the advanced search. Enterprises, which require many useful and valuable data, are typical examples. They have to use the advanced search frequently to find much reports and investigations about the markets.

Definitely, CE Search™ cannot guarantee that you must find the data or Web pages you want. CE creates this software for enterprises and individuals to promote the efficiency and accuracy of search. Anyway, search engines still control the results. You cannot find many things, after search engines hide them intentionally.

You can use CE Search™ to create the keywords of advanced search in your computer and use them repeatedly. At the beginning, you may not find the advantage of CE Search™. However, you can benefit from this software greatly, if you keep using it for a long time.

Good Luck!

About Owner

Beijing Sound & Bamboo Network Technology Service Center is a commercial organization, which works in Beijing, China. It was found on October 15, 2008. Before registration in Beijing government, its team has been researching and developing technology over three years. It professionally provides high quality network services and software products.

Currently, it has a Website, which is called *Casual Engine*. This Website specially provides offline network service. Its mission is to reduce the costs of enterprises and individuals. Besides, it creates values for them.
