

# Unzip File Directions

---

**Unzip:** You will need to "unzip" the file using a program such as Winzip®. You can download a free evaluation version of WinZip® at [www.winzip.com](http://www.winzip.com)

If the file is not unzipped the program will be "Read Only" and you will not be able to save any changes.

Windows XP comes with a built-in "unzip" utility. Right-click on the .zip file and select "Extract all..."
