## Supported Delphi and C++Builder versions

---

The TMS HTML Controls Pack supports following development environments:

Borland Delphi 5 (Professional, Enterprise)  
Borland Delphi 6 (Professional, Enterprise)  
Borland Delphi 7 (Professional, Enterprise, Architect)  
Borland Delphi 2005 (Professional, Enterprise, Architect)  
Borland Delphi 2006 (Professional, Enterprise, Architect)  
CodeGear Delphi 2007 (Professional, Enterprise)  
CodeGear Delphi 2009 (Professional, Enterprise)  
Embarcadero Delphi 2010 (Professional, Enterprise)  
Embarcadero Delphi XE (Professional, Enterprise)  
Embarcadero Delphi XE2 (Professional, Enterprise)  
Embarcadero Delphi XE3 (Professional, Enterprise)

Borland C++Builder 5 (Professional, Enterprise)  
Borland C++Builder 6 (Professional, Enterprise)  
CodeGear C++Builder 2007 (Professional, Enterprise)  
CodeGear C++Builder 2009 (Professional, Enterprise)  
Embarcadero C++Builder 2010 (Professional, Enterprise)  
Embarcadero C++Builder XE (Professional, Enterprise)  
Embarcadero C++Builder XE2 (Professional, Enterprise)  
Embarcadero C++Builder XE3 (Professional, Enterprise)

The TMS HTML Controls Pack can be simultaneously installed and used on multiple development environments on a single machine.

## Supported Operating Systems

---

Windows 98  
Windows Millenium  
Windows 2000  
Windows XP  
Windows 2003  
Windows Vista  
Windows 2008  
Windows 7

## Installation

---

### Registered version with Delphi

#### 5,6,7,2005,2006,2007,2009,2010,XE,XE2,XE3

- Unzip the file TMSHTMLControlsREG.ZIP to a new directory "TMSHTMLControls"
- Add the directory "TMSHTMLControls" to your Delphi library path
- Open the file TMSHTMLControlsDx.DPK, compile and install the package.

with x:

x = 5 for Delphi 5  
x = 6 for Delphi 6  
x = 7 for Delphi 7  
x = 2005 for Delphi 2005  
x = 2006 for Delphi 2006  
x = 2007 for Delphi 2007  
x = 2009 for Delphi 2009  
x = 2010 for Delphi 2010  
x = XE for Delphi XE  
x = XE2 for Delphi XE2  
x = XE3 for Delphi XE3

### Registered version with C++Builder 5,6,2007,2009,2010,XE,XE2,XE3

- Unzip the file TMSHTMLControlsREG.ZIP to a new directory "TMSHTMLControls"
- Add the directory "TMSHTMLControls" to your Delphi library path
- Open the file TMSHTMLControlsCx.y, compile and install the package.

with x.y:

x.y = 5.BPK for C++Builder 5  
x.y = 6.BPK for C++Builder 6  
x.y = 2007.CBPROJ for C++Builder 2007  
x.y = 2009.CBPROJ for C++Builder 2009  
x.y = 2010.CBPROJ for C++Builder 2010  
x.y = XE.CBPROJ for C++Builder XE  
x.y = XE2.CBPROJ for C++Builder XE2  
x.y = XE3.CBPROJ for C++Builder XE3

## Installing online help

### **Delphi 5,6,7 & C++Builder 5,6**

In Delphi 6 add TMSHTMLd6.ALS FIRST in the {\$DELPHI}\Help dir.  
In Delphi 7 add TMSHTMLd7.ALS FIRST in the {\$DELPHI}\Help dir.

In the Delphi or C++Builder help menu, choose Customize  
Add the appropriate .HLP file to the list of help files in the Index tab  
and save.

### **Delphi 2005, 2006, 2007, 2009, 2010 & C++Builder 2006, 2007, 2009, 2010, XE**

Close the IDE, make sure the process DEXPLORER.EXE is not longer running.

Delphi 2005 Execute: RegHelp2 /i TMSHTMLdBds3W.hxx  
Delphi 2006 Execute: RegHelp2 /i TMSHTMLdBds4W.hxx  
Delphi 2007 Execute: RegHelp2 /i TMSHTMLdBds5W.hxx  
Delphi 2009 Execute: RegHelp2 /i TMSHTMLdRs2009W.hxx  
Delphi 2010 Execute: RegHelp2 /i TMSHTMLdRs2010W.hxx  
Delphi XE Execute: RegHelp2 /i TMSHTMLdRsXEW.hxx  
Delphi XE2 Execute: RegHelp2 /i TMSHTMLdRsXE2W.hxx

C++Builder 2006 Execute: RegHelp2 /i TMSHTMLbBds4W.hxx  
C++Builder 2007 Execute: RegHelp2 /i TMSHTMLbBds5W.hxx  
C++Builder 2009 Execute: RegHelp2 /i TMSHTMLbRs2009W.hxx  
C++Builder 2010 Execute: RegHelp2 /i TMSHTMLbRs2010W.hxx  
C++Builder XE Execute: RegHelp2 /i TMSHTMLbRsXEW.hxx  
C++Builder XE2 Execute: RegHelp2 /i TMSHTMLbRsXE2W.hxx

## Upgrading from previous version

As new properties have been added, some properties have changed, follow these steps for a trouble free upgrade :

### 1) Uninstall TMSHTMLControls

-Delphi 5,6,7,2005,2006,2007,2009,2010,XE,XE2,XE3

In the Component Menu, Install packages and remove the package  
in which TMS HTML Controls Pack is located.

- C++Builder 5,6,2007,2009,2010,XE,XE2,XE3

In the Component Menu, Install packages and remove the package  
in which TMS HTML Controls Pack is located.

### 2) Remove all files related to TMS HTML Controls Pack on your HD. Sometimes, several copies of a previous version exist and confuse the environment

### 3) Install the new version

- 4) If any projects have been created with a previous version of TMS HTML Controls Pack, open these projects and open ALL forms in which the HTML Controls Pack has been used. While opening the forms, ignore all errors related to properties of these HTML controls. Save and close all these forms and only then recompile the application.

## Updates

---

The TMS HTML Controls Pack comes with a full version cycle of free updates. A full version cycle means that from version x.y to version x+1.y, the updates are free. For example, if a registration starts at version v2.1, updates are free till version v3.1. The latest date of the updates can be seen after login on our website (see next section). This date reflects the exact file date of the latest update.

## Support

---

TMS HTML Controls Pack registered users have priority support on the special email:  
[support@tmssoftware.com](mailto:support@tmssoftware.com)

For peer to peer support for registered users only, a newsgroup is available. Details about the newsgroup server and login can be found on the registered users page after login on our website.

## Website login

Registered users of the TMS HTML Controls Pack receive a code with which it is possible to login on the website to obtain:

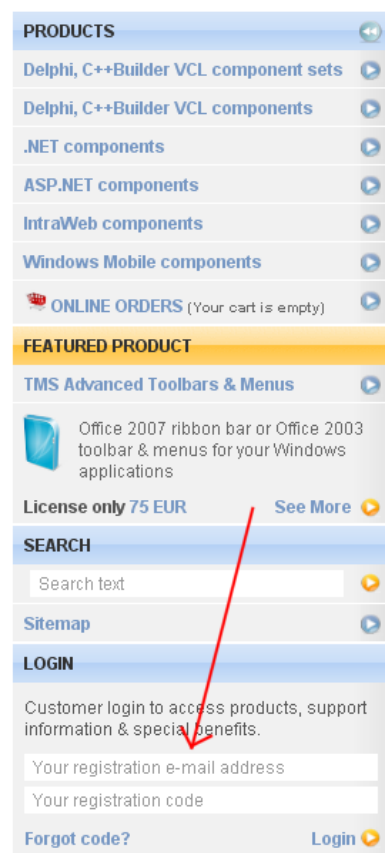

- Free updates for a full version cycle of the components.
- Discount offers on other products
- Access to additional documentation
- Access to samples projects
- Change registration email
- Information for peer to peer support newsgroup access

Login on the website is done with:

- Email with which you registered the TMS HTML Controls Pack
- Code that is sent by email with the first registered version

Direct link to login:

<http://www.tmssoftware.com/site/login.asp>

### Important notes

Keep this email and code in a safe place.

If for some reason, your registration email address changes, the only way to have this updated is by sending email to TMS software to request for a change. The email must be sent from the original email address and specify the new address to change to.

## License agreement

---

The TMS HTML Controls Pack is available with two licensing schemes, a single developer license and a site license. The details of the two license types are below:

### TMS HTML Controls Pack single developer license

The single developer license of the component gives you the right to:

- Using the component for development of applications or any type of software module in general by a single developer within the company holding the license.
- Sell any commercial compiled application with the control, published by the company holding the license
- Make modifications to the source code of component for own use.
- Use the component and source code on all development systems used by the developer assigned by the company holding the license.
- Request future versions of the component at any time either through the web or by email for a full version cycle of the component. After expiry of the registration TMS software can no longer provide any old version of software, documentation or samples. TMS software is not a backup service and expects backups to be made by the licensed user.
- Access to priority email support by the single developer assigned by the company holding the license.
- Sell any number of applications in any quantity without any additional run-time fees or royalties required.

The license agreement prevents you from:

- Distributing parts or full source code of any component from TMS software.
- Using parts or full source code of components from the TMS software for creating any type of other components that are distributed or sold with or without source code.
- Changing the source code of any component from TMS software and sell or distribute this as a modified product.
- Creating a descendant compiled product such as OCX or ActiveX control and sell or distribute this as a product.
- Using the control in applications sold with different publisher name than the company holding the license.
- Transfer the license to any other developer than the original registered developer
- Using the components by multiple developers in the company holding the license
- Transfer the license to any other developer than the original registered developer
- Using the components by multiple developers in the company holding the license

## TMS HTML Controls Pack site license

The site license of the component gives you the right to:

- Using the component for development of applications or any type of software module in general by a single developer within the company holding the license.
- Sell any commercial compiled application with the control, published by the company holding the license
- Make modifications to the source code of component for own use.
- Use the component and source code on all development systems used by the developer assigned by the company holding the license.
- Request future versions of the component at any time either through the web or by email for a full version cycle of the component. After expiry of the registration TMS software can no longer provide any old version of software, documentation or samples. TMS software is not a backup service and expects backups to be made by the licensed user.
- Access to priority email support by the single developer assigned by the company holding the license.
- Sell any number of applications in any quantity without any additional run-time fees or royalties required.
- Change at any time the number of developers using the TMS software components within the company holding the license.
- Notify TMS software at any time to allow new developers within the company to access the priority email support.
- Allow any number of developers within the company holding the license to access the web based interface for obtaining product updates.

The site license agreement prevents you from:

- Distributing parts or full source code of any component from TMS software.
- Using parts or full source code of components from the TMS software for creating any type of other components that are distributed or sold with or without source code.
- Changing the source code of any component from TMS software and sell or distribute this as a modified product.
- Creating a descendant compiled product such as OCX or ActiveX control and sell or distribute this as a product.
- Using the control in applications sold with different publisher name than the company holding the license.
- Transfer the license to any other developer not working for the company holding the license.

## Termination of license

---

The license agreement terminates immediately after violation of any of the terms and conditions described. A termination of the license means that the company has no longer any rights to use the components for development, sell applications using the components, obtain free updates of the components and is no longer entitled to email support or any other form of support.

The company or developer holding the license is responsible for respecting the terms and conditions of the license agreement and shall thus make sure that no other person has access to the TMS Components to use these for any purposes that violate the license agreement.

## Component overview

---

### **TDBHTMLLabel**

A data-aware label with HTML formatting capabilities

### **THTMLButtons**

Standard, flat, Borland and TMS Checkbox, Radiobutton, RadioGroup, Button with HTML formatted captions

### **THTMLCheckList & THTMLListBox**

A listbox & checklist that can contain text with HTML formatting capabilities

### **THTMLComboBox**

A combobox that can contain text with HTML formatting capabilities

### **THTMLCredit**

Automatic scrolling credits label with HTML formatting capabilities

### **THTMLDialog**

Message Dialog with HTML formatting capabilities

### **THTMLForm**

Create dynamic runtime HTML forms with controls

### **THTMLHint**

Gives your applications HTML formatted hints

### **THTMLLabel**

A label with HTML formatting capabilities

### **THTMLPopup**

A MS Messenger like popup box with HTML formatting capabilities

### **THTMLStaticText**

A label with HTML formatting capabilities

### **THTMLStatusBar**

A statusbar with panels that can contain text with HTML formatting & more

### **THTMLTreeList & THTMLTreeView**

A treeview and listview combined with columns with different formatting capabilities
